ICCF Congress decided about Changes in Rating Rules

On August, 28 the webserver calculated the ratings 2008/2, based on the rateable results reported during the first half of 2008. The process provided me with a detailed protocol for download. After a careful review I was able to make the ratings available to everybody on the ICCF webserver.

The recent ICCF Congress followed my proposals and decided about some significant changes in the Rating Rules. These new rules are shown in this list, see page 67 to 71. The changes affect the next calculation and of course the forecast in Eloquery. I needed some more time than expected to adjust this program package, sorry, but now it is available as usual. I hope you will enjoy it.

Another important change provides that we will have more ratinglists in future, three in 2009 and quarterly from 2010 onwards. The current rating period lasts from 01/07/2008 till 28/02/2009 (not 31/12/2008 !). The next calculation starts at 15/03/2009 and the ratings will be valid from 01/04/2009 till 30/06/2009.

The Top-List includes only players with a fixed rating and with results after 2002.

Die Top-Liste zeigt nur Spieler mit gesicherter Wertung und mit Ergebnissen nach 2002.

Extract of the “Tournament Rules“ - Chapter 7 - “Rating Numbers“

- 1 It is the sincere wish of the ICCF to award equivalent titles for equivalent achievement. Under the ICCF rating system each player obtains a rating based upon a method of statistical probability, calculated from tournament results over a period of many years.
- 2 The tournaments which are taken into the rating system are:
 - (a) All ICCF tournaments except thematic tournaments,
 - (b) principal zonal tournaments, team championships, master class, higher class and open class promotion tournaments,
 - (c) national tournaments, subject to an agreement with the Ratings Commissioner. At least the final of a national championship, team championship or cup final,
 - (d) other individual and team tournaments including “Scheveningen” type events, authorised by the ICCF-Congress or Executive Board,
 - (e) friendly matches between countries.

Rated tournaments must have a minimum reflection time of 20 days for 10 moves in postal and 30 days for 10 moves in electronic transmission.

Tournaments with postal or email transmission will be evaluated only if they are administrated on the ICCF-Webserver. Responsible for this task are the tournament directors and the delegates of the national federations, respectively.

- 3 Each player who has completed games in the tournaments referred to in § 7.2 obtains a rating. This rating will be published only if the player has completed at least 12 games. A rating based on at least 30 completed games is a “fixed” rating.
- 4 The rating calculation procedure would use players’ ratings as at the start of a tournament for those players with a published rating in the applicable ratings list. For newer players, FIDE ratings may be used if available, failing which a player would be regarded as having a rating equal to the tournament level. In case of a wrong or obviously inappropriate value the Ratings Commissioner may adjust such a start rating to a more realistic value, even if the tournament is already ongoing.
- 5 A new rating list will be released four times each year. The ratings are valid from January - March, April - June, July - September and October - December, respectively and are based on the results which were reported at least one month before. The new ratings will be available on the ICCF webserver two weeks before their validity date.
- 6 The rating list shall contain:
 - (a) the effective date
 - (b) the name and federation of each player with at least 12 rated games,
 - (c) the ICCF title held by each player listed,
 - (d) the current rating and the number of rated games for each player listed.
- 7 Players who appeared on previous lists but who do not qualify for a new rating because they have not finished a game during the evaluated period are nevertheless considered currently at their most recently published rating. Players will be considered inactive if they do not finish a rateable game for five years. Those players are no longer shown in the published lists.

Auszug aus der "Turnierordnung" - Kapitel 7 - "Wertungszahlen"

- 1 Es ist das Anliegen der ICCF, für gleiche Leistungen gleiche Titel zu verleihen. Im ICCF-Wertungszahlensystem erhält jeder Spieler eine Wertungszahl, die auf der langjährigen Auswertung von Turnierergebnissen nach zuverlässigen statistischen Methoden beruht.
- 2 Die Turniere, deren Ergebnisse im Wertungssystem bearbeitet werden, sind:
 - (a) Alle ICCF-Turniere mit Ausnahme der Thematurniere,
 - (b) Spitzenturniere, Mannschaftsmeisterschaften und Aufstiegsturniere in der Meister-, Hauptturnier- und offenen Klasse der Zonen,
 - (c) alle diejenigen nationalen Turniere, die in einer Vereinbarung mit dem Wertungsreferenten festgelegt werden, mindestens aber die Finalrunden der nationalen Meisterschaft, der Mannschaftsmeisterschaft und der Pokalmeisterschaft,
 - (d) andere Individual- und Mannschaftsturniere einschließlich Turniere nach Scheveninger System, die vom ICCF-Kongress oder Präsidium genehmigt worden sind,
 - (e) Freundschaftsländerkämpfe.

Turniere, die ausgewertet werden sollen, müssen eine Mindest-Bedenkzeit von 20 Tagen für 10 Züge bei postalischer bzw. 30 Tagen für 10 Züge bei elektronischer Übermittlung haben.

Turniere, die per Post oder Email gespielt werden, können nur dann ausgewertet werden, wenn sie auf dem ICCF-Webserver verwaltet werden. Verantwortlich dafür sind die Turnierleiter bzw. die Delegierten der nationalen Föderationen.

- 3 Jeder Spieler, der Partien in Turnieren gemäß § 7.2 beendet hat, bekommt eine Wertung. Diese wird nur dann veröffentlicht, wenn der Spieler mindestens 12 bearbeitete Partien beendet hat. Eine Wertung, die auf mindestens 30 Partien basiert, heißt "gesicherte" Wertung.
- 4 Für die Auswertung der Partien eines Turnieres werden die bei Turnierbeginn gültigen Wertungen benutzt. Spieler, die zu diesem Zeitpunkt keine veröffentlichte Wertung haben, werden mit einem Wert entsprechend der Turnierkategorie angesetzt. Stattdessen kann auch eine gültige FIDE-Wertung berücksichtigt werden. Im Falle von offensichtlich unzutreffenden Werten kann der Wertungsreferent eine mehr realistische Statwertung zuordnen, auch wenn das Turnier bereits begonnen hat.
- 5 Jährlich werden vier Wertungslisten erstellt. Die veröffentlichten Wertungszahlen sind gültig von Januar – März, April – Juni, Juli – September bzw. Oktober – Dezember und basieren auf den Ergebnissen, die spätestens einen Monat zuvor gemeldet wurden. Die neuen Wertungszahlen werden zwei Wochen vor ihrem Gültigkeitsdatum auf der Internetseite der ICCF bereitgestellt.
- 6 Eine Wertungsliste enthält:
 - (a) das Geltungsdatum (April - September, bzw. Oktober bis März),
 - (b) Name und Föderation der Spieler mit mindestens 12 gewerteten Partien,
 - (c) einen evtl. ICCF-Titel jedes aufgeführten Spielers,
 - (d) die aktuelle Wertungszahl und die Anzahl der gewerteten Partien jedes Spielers.
- 7 Spieler, die auf früheren Listen geführt wurden aber keine neue Wertungszahl erhalten, weil sie keine Partie in der aktuellen Auswertungsperiode beendet haben, werden trotzdem noch als gewertet betrachtet und zwar mit der zuletzt veröffentlichten Wertung. Als inaktiv gelten Spieler, deren letztes wertungsfähige Ergebnis mehr als fünf Jahre zurückliegt. Solche Spieler werden nicht mehr in der Liste aufgeführt.

The Working Rules

Anwendungsregeln

General Principles

- 1 The ICCF Rating system is a numerical system in which percentage scores are convertible to rating differences and conversely, rating differences are convertible to scoring probabilities.
- 2 The basic of the system is the normal probability function of statistical probability theory. For convenience sake this function has been put into tabular form for the conversions indicated in 1.
- 3 Table of conversions from percentage P into rating difference Dp:

Allgemeine Prinzipien

- Das ICCF-Wertungssystem ist ein numerisches System, in welchem prozentuale Leistungen in Wertungsunterschiede und umgekehrt Wertungsdifferenzen in Leistungswahrscheinlichkeiten umgewandelt werden können.
- Die Grundlage des Systems bildet die normale Wahrscheinlichkeitsfunktion der statistischen Wahrscheinlichkeitstheorie. Diese wird tabellarisch für die in Punkt 1 bezeichneten Umwandlungen dargestellt.
- Umwandlungstabelle von prozentualer Leistung P in Wertungsdifferenz Dp:

| P | Dp | P | Dp | P | Dp | P | Dp | P | Dp | P | Dp |
|------|-----|------|-----|------|-----|------|-------|------|-------|------|-------|
| 1.00 | 677 | 0.83 | 273 | 0.66 | 117 | 0.49 | - 7 | 0.32 | - 133 | 0.15 | - 296 |
| 0.99 | 677 | 0.82 | 262 | 0.65 | 110 | 0.48 | - 14 | 0.31 | - 141 | 0.14 | - 309 |
| 0.98 | 589 | 0.81 | 251 | 0.64 | 102 | 0.47 | - 21 | 0.30 | - 149 | 0.13 | - 322 |

| 77 - 83 | 0.61 | 0.39 | 180 - 188 | 0.74 | 0.26 | 316 - 328 | 0.87 | 0.13 | | | |
| 84 - 91 | 0.62 | 0.38 | 189 - 197 | 0.75 | 0.25 | 329 - 344 | 0.88 | 0.12 | | | |

The Working Formulae

- 5 For the calculation of a rating of a player who has not yet played 30 games:

$$R_p = R_c + D(p) * F$$

- R_p the rating of the player
 R_c the average rating of all his opponents, limited to a maximum difference of 350
 $D(p)$ the difference in rating based on the percentage score p , obtained from item 3
 F the correction factor depending on the percentage score p in the following way:

$$F = -2 * p^2 + 2 * p + 0.5$$

- 6 The new rating of a player with a fixed rating from the previous period is calculated by:

$$R_n = R_0 + \sum \Delta R$$

- R_n the new rating of the player
 R_0 the old rating of the player
 $\sum \Delta R$ the summation of the rating changes in all his games during the rating period

- 7 Calculation of a change in rating after a game is made by:

$$\Delta R = k * \Delta W = k * (W - W_e)$$

- ΔR the change of the rating for a finished game
 W the actual game result (1, 1/2, 0)
 W_e the expected result of the game
 k the rating point value for a game point (or: the development coefficient)

- 8 The expected game result W_e is the percentage expectancy, obtained from item 4, based on the difference between the player's rating and the opponent's rating at the beginning of the game. If this difference is > 350, it is snipped to this value for the evaluation.

A player without a published ICCF rating at that time will be regarded as having a rating equal to the tournament level (see item 11).

- 9 The development coefficient k is used as a stabilising factor in the system:

$$k = r * g$$

$$r = \begin{cases} 10 & \text{if } R_0 \geq 2400 \\ 70 - R_0 / 40 & \text{if } 2000 < R_0 < 2400 \\ 20 & \text{if } R_0 \leq 2000 \end{cases}$$

- R_0 the old (that is: the most recently calculated) rating of the player
 g_n the total number of rated games played by this player

- 10 From 2009 onwards the former used significance factor f is no longer valid.

Arbeitsformeln

Für die Berechnung einer Wertung für Spieler, die noch nicht 30 Partien gespielt haben:

die Wertung des Spielers
 die durchschnittliche Wertung aller seiner Gegner, begrenzt auf eine maximale Differenz von 350
 die Wertungsdifferenz aus Tabelle 3 für das erreichte Prozentergebnis p
 der Korrekturfaktor, der auf folgende Weise vom Prozentergebnis p abhängt:

Die neue Wertung eines Spielers mit gesicherter Wertung aus der Vorperiode wird berechnet mittels:

die neue Wertung des Spielers
 die alte Wertung des Spielers
 die Summe aller Wertungsänderungen aus seinen Partien in der Wertungsperiode.

Die Berechnung der Wertungsänderung für eine beendete Partie erfolgt mittels:

die Änderung der Wertung für eine beendete Partie
 das tatsächliche Partie-Ergebnis (1, 1/2, 0)
 das erwartete Partie-Ergebnis
 der Wertungspunkt-Kurs eines Partie-Punktes (oder: der Entwicklungskoeffizient)

Das erwartete Partie-Ergebnis W_e ist die prozentuale Erwartung aus Tabelle 4, basierend auf der Differenz zwischen der Wertung des Spielers und der Wertung des Gegners zu Beginn der Partie. Wenn diese Differenz > 350 ist, wird sie für die Auswertung auf diesen Wert begrenzt.

Für Spieler ohne veröffentlichte ICCF Wertung zu diesem Zeitpunkt wird eine Wertung entsprechend dem Turnier-Level angenommen (siehe Punkt 11).

Der Entwicklungskoeffizient k wird als stabilisierender Faktor in dem System verwendet:

$$g = \begin{cases} 1 & \text{für } g_n \geq 80 \\ 1.4 - g_n / 200 & \text{für } 30 < g_n < 80 \\ 1.25 & \text{für } g_n \leq 30 \end{cases}$$

die alte (d.h. zuletzt berechnete) Wertung des Spielers
 die Gesamtzahl der bisher gewerteten Partien des Spielers

Ab 2009 wird der früher benutzte Signifikanzfaktor f nicht mehr berücksichtigt.

- 11 Assumed rating for a player without a published rating at the beginning of a tournament:

- 1800 Open class, cup preliminary rounds, international open preliminary rounds
- 1900 Ladies' WC semifinals, ladies' olympiads
- 2000 Higher class, cup semifinals, international open semifinals
- 2100 Ladies' WC finals, money price tournam.
- 2200 Master class, cup finals, olympiads, zonal championship preliminary rounds

For national tournaments the average of the already rated participants is assumed, maximum 2400.

For friendly matches, normally a value of 1800 applies. In special cases Team Captains are allowed to propose other values than 1800 where appropriate. These values have to be confirmed and may be changed by the Ratings Commissioner before a tournament starts.

For new kinds of tournaments a value shall be fixed with the announcement of the tournament.

Angenommene Wertung für Spieler, die zu Turnierbeginn keine veröffentlichte Wertung besitzen:

- 2200 Invitation (team) tournaments, international open finals
- 2300 Masternorm tournaments
- 2400 WC semifinals, zonal championship semifinals
- 2450 Grandmasternorm tournaments
- 2500 WC candidates, zonal championship finals

Für nationale Turniere wird der Durchschnitt der bereits gewerteten Teilnehmer benutzt, maximal 2400.

Für Freundschafts-Länderkämpfe gilt normalerweise ein Wert von 1800. In Ausnahmefällen können die Mannschaftsführer geeignetere Werte vorschlagen. Diese bedürfen der Zustimmung des Wertungsreferenten und können von diesem vor Turnierbeginn geändert werden.

Für neue Turnierarten wird ein Wert in der Turnier-Ausschreibung festgesetzt.

Calculation procedure

- 12 From 2009 onwards at the beginning of each quarter a new ratinglist is published. All results which were reported at least one month before will be eligible for inclusion on the next list.
- 13 Valid results from postal and email tournaments must be registered by the tournament directors on the ICCF-Webserver no later than two weeks before the list has to be published.
- 14 Players without a rating from previous periods get their first rating based on the games finished during the current period, using the formula 5.
- 15 Each player who has a rating based on less than 30 games at the beginning of the rating period, receives a new rating based on all his games. This is done with the formula of item 5.
- 16 For each player whose rating was based on at least 30 games at the beginning of the period the new rating is calculated using the formula 6, except for those players who finished more than 800/k games in the current period. For those players a new rating is calculated, based on the formula 5 only for their games in that period.
- 17 The new rating for the next ICCF rating list is rounded to the nearest integer.
- 18 Rules for the rating of games in team tournaments in which a substitute player takes part:
 - a) A game of a substitute player is only counted for his new rating if ΔW is positive for him. Otherwise the game is counted for the player who has been substituted.
 - b) For the opponent the game is counted as being played against the player (the original or the substitute) with the highest rating.

Berechnungsmethode

- Ab 2009 wird zu Beginn eines jeden Quartals eine neue Wertungszahlenliste veröffentlicht. Alle bis spätestens einen Monat vorher gemeldeten Ergebnisse sind wertungsfähig für die nächste Liste.
- Die wertungsfähigen Ergebnisse aus Post- und Email-Turnieren müssen spätestens zwei Wochen vor dem Erscheinungsdatum von den Turnierleitern auf dem ICCF-Webserver registriert werden.
- Spieler, die bisher keine Wertung hatten, erhalten ihre erste Wertung, basierend auf den in der laufenden Periode beendeten Partien, gemäß Formel 5.
- Ein Spieler, dessen Wertung zu Beginn einer Periode auf weniger als 30 Partien beruht, erhält eine neue Wertung, basierend auf allen von ihm bis dahin beendeten Partien. Dazu wird die Formel in Punkt 5 benutzt.
- Für die Spieler, deren Wertung zu Beginn der Periode auf mindestens 30 Partien beruhte, wird eine neue Wertungszahl berechnet gemäß Formel 6, außer für solche, die in dieser Periode mehr als 800/k Partien beendet haben. Für diese Spieler wird die neue Wertung berechnet gemäß Formel 5, dabei werden nur die Partien aus der laufenden Periode berücksichtigt.
- Die neue Wertung wird für die nächste ICCF-Wertungsliste zur nächsten ganzen Zahl auf- oder abgerundet.
- Regelungen für die Wertung von Partien in Mannschaftsturnieren, in denen Ersatzspieler spielen:
- a) Eine Partie eines Ersatzspielers wird nur dann für seine neue Wertung berücksichtigt, wenn ΔW für ihn positiv ist. Sonst wird die Partie dem Spieler zugerechnet, der ersetzt worden ist.
 - b) Dem Gegner wird die Partie so zugerechnet, als ob sie gegen den Spieler mit der höheren Wertung gespielt worden wäre.
