Rating Calculation Procedure is Using New Rules

Many questions which I got in recent months let me assume that a lot of players did not yet realize the change in the Rating Rules which was decided by the ICCF Congress in 2011. It concerns the calculation method for the expected result of a game based on the difference between the player's rating and the opponent's rating. During last 12 years this was always the difference between the start ratings.

The new formula calculates this difference now using the recent published rating for the player and the higher value of start rating and recent rating for the opponent. Using newest ratings for the calculation will surely lead to a quicker approximation to the players' real strength. Using the opponent's better value (start rating or recent rating) is a good compromise to consider a player's development during the game and to avoid disadvantages if he goes down due to circumstances outside of the game.

The ratings before you are based on the results from 01/12/2011 to 29/02/2012 and valid from 01/04/2012 till 30/06/2012. The next list will be published at 15/06/2012 and will be valid for the 3rd quarter of 2012.

The Top-List includes only players with a fixed rating and with results after 2009.

Die Top-Liste zeigt nur Spieler mit gesicherter Wertung und mit Ergebnissen nach 2009.

Extract of the “Tournament Rules“ - Chapter 9 - “Rating Numbers“

- 1 It is the sincere wish of the ICCF to award equivalent titles for equivalent achievement. Under the ICCF rating system each player obtains a rating based upon a method of statistical probability, calculated from tournament results over a period of many years.
- 2 The tournaments which are taken into the rating system are:
 - (a) All ICCF tournaments except thematic tournaments,
 - (b) principal zonal tournaments, team championships, master class, higher class and open class promotion tournaments,
 - (c) national tournaments, subject to an agreement with the Ratings Commissioner. At least the final of a national championship, team championship or cup final,
 - (d) other individual and team tournaments including “Scheveningen” type events, authorised by the ICCF-Congress or Executive Board,
 - (e) friendly matches between countries.

Rated tournaments must have a minimum reflection time of 20 days for 10 moves in postal and 30 days for 10 moves in electronic transmission.

Tournaments with postal or email transmission will be evaluated only if they are administrated on the ICCF-Webserver. Responsible for this task are the tournament directors and the delegates of the national federations, respectively.

- 3 Each player who has completed games in the tournaments referred to in § 9.2 obtains a rating. This rating will be published only if the player has completed at least 12 games. A rating based on at least 30 completed games is a “fixed“ rating.
- 4 At the beginning of a tournament start ratings are assigned for those players with a published rating in the applicable ratings list. For newer players, FIDE ratings may be used if available, failing which a player would be regarded as having a rating equal to the tournament level. In case of a wrong or obviously inappropriate value the Ratings Commissioner may adjust such a start rating to a more realistic value, even if the tournament is already ongoing.

When a game is finished, the rating calculation procedure will use a player’s rating from the newest rating list for those players with a published rating; otherwise, the start rating is used. However, if a player’s current rating is lower than his start rating; the new ratings for his opponents are calculated using the player’s start rating.
- 5 A new rating list will be released four times each year. The ratings are valid from January - March, April - June, July - September and October - December, respectively and are based on the results which were reported at least one month before. The new ratings will be available on the ICCF webserver two weeks before their validity date.
- 6 The rating list shall contain:
 - (a) the effective date
 - (b) the name and federation of each player with at least 12 rated games,
 - (c) the ICCF title held by each player listed,
 - (d) the current rating and the number of rated games for each player listed.
- 7 Players who do not qualify for a new rating because they have not finished a game during the evaluation period, remain on the active list because (a) they have finished a ratable game during the recent two calendar years, or (b) they are participating in at least one running tournament (rated or unrated). Other players retain their most recent published rating, but are no longer shown in the published list. However, the webserver shows all players with their valid rating.

Auszug aus der "Turnierordnung" - Kapitel 9 - "Wertungszahlen"

- 1 Es ist das Anliegen der ICCF, für gleiche Leistungen gleiche Titel zu verleihen. Im ICCF-Wertungszahlensystem erhält jeder Spieler eine Wertungszahl, die auf der langjährigen Auswertung von Turnierergebnissen nach zuverlässigen statistischen Methoden beruht.
- 2 Die Turniere, deren Ergebnisse im Wertungssystem bearbeitet werden, sind:
 - (a) Alle ICCF-Turniere mit Ausnahme der Thematurniere,
 - (b) Spitzenturniere, Mannschaftsmeisterschaften und Aufstiegsturniere in der Meister-, Hauptturnier- und offenen Klasse der Zonen,
 - (c) alle diejenigen nationalen Turniere, die in einer Vereinbarung mit dem Wertungsreferenten festgelegt werden, mindestens aber die Finalrunden der nationalen Meisterschaft, der Mannschaftsmeisterschaft und der Pokalmeisterschaft,
 - (d) andere Individual- und Mannschaftsturniere einschließlich Turniere nach Scheveninger System, die vom ICCF-Kongress oder Präsidium genehmigt worden sind,
 - (e) Freundschaftsländerkämpfe.

Turniere, die ausgewertet werden sollen, müssen eine Mindest-Bedenkzeit von 20 Tagen für 10 Züge bei postalischer bzw. 30 Tagen für 10 Züge bei elektronischer Übermittlung haben.

Turniere, die per Post oder Email gespielt werden, können nur dann ausgewertet werden, wenn sie auf dem ICCF-Webserver verwaltet werden. Verantwortlich dafür sind die Turnierleiter bzw. die Delegierten der nationalen Föderationen.

- 3 Jeder Spieler, der Partien in Turnieren gemäß § 9.2 beendet hat, bekommt eine Wertung. Diese wird nur dann veröffentlicht, wenn der Spieler mindestens 12 bearbeitete Partien beendet hat. Eine Wertung, die auf mindestens 30 Partien basiert, heißt "gesicherte" Wertung.
- 4 Zu Beginn eines Turniers erhalten alle Spieler eine Startwertung, basierend auf der zu diesem Zeitpunkt gültigen Wertungsliste. Spieler ohne gültige Wertung werden mit einem Wert entsprechend der Turnierkategorie angesetzt. Stattdessen kann auch eine aktuelle FIDE-Wertung berücksichtigt werden. Im Falle von offensichtlich unzutreffenden Werten kann der Wertungsreferent eine mehr realistische Startwertung zuordnen, auch wenn das Turnier bereits begonnen hat.

Für die Auswertung einer beendeten Partie wird die zum Zeitpunkt des Partieendes gültige Wertung herangezogen, für Spieler ohne gültige Wertung gilt die Startwertung. Wenn die aktuelle Wertung eines Spielers niedriger ist als seine Startwertung, wird für die Ermittlung der Wertungen seiner Gegner die höhere Startwertung benutzt.

- 5 Jährlich werden vier Wertungslisten erstellt. Die veröffentlichten Wertungszahlen sind gültig von Januar – März, April – Juni, Juli – September bzw. Oktober – Dezember und basieren auf den Ergebnissen, die spätestens einen Monat zuvor gemeldet wurden. Die neuen Wertungszahlen werden zwei Wochen vor ihrem Gültigkeitsdatum auf der Internetseite der ICCF bereitgestellt.
- 6 Eine Wertungsliste enthält:
 - (a) das Geltungsdatum (April - September, bzw. Oktober bis März),
 - (b) Name und Föderation aller aktiven Spieler mit mindestens 12 gewerteten Partien,
 - (c) einen evtl. ICCF-Titel jedes aufgeführten Spielers,
 - (d) die aktuelle Wertungszahl und die Anzahl der gewerteten Partien jedes Spielers.
- 7 Spieler, die auf früheren Listen geführt wurden aber keine neue Wertungszahl erhalten, weil sie keine Partie in der aktuellen Auswertungsperiode beendet haben, gelten trotzdem noch als aktiv, wenn ihr letztes Ergebnis nicht mehr als zwei Kalenderjahre zurückliegt oder wenn sie an einem laufenden Turnier teilnehmen. Die Wertungsliste auf dem Webserver zeigt auch die zuletzt gültige Wertung für alle inaktiven Spieler.

The Working Rules

Anwendungsregeln

General Principles

- 1 The ICCF Rating system is a numerical system in which percentage scores are convertible to rating differences and conversely, rating differences are convertible to scoring probabilities.
- 2 The basic of the system is the normal probability function of statistical probability theory. For convenience sake this function has been put into tabular form for the conversions indicated in 1.
- 3 Table of conversions from percentage P into rating difference Dp:

Allgemeine Prinzipien

- Das ICCF-Wertungssystem ist ein numerisches System, in welchem prozentuale Leistungen in Wertungsunterschiede und umgekehrt Wertungsdifferenzen in Leistungswahrscheinlichkeiten umgewandelt werden können.
- Die Grundlage des Systems bildet die normale Wahrscheinlichkeitsfunktion der statistischen Wahrscheinlichkeitstheorie. Diese wird tabellarisch für die in Punkt 1 bezeichneten Umwandlungen dargestellt.
- Umwandlungstabelle von prozentualer Leistung P in Wertungsdifferenz Dp:

| P | Dp | P | Dp | P | Dp | P | Dp | P | Dp | P | Dp |
|------|-----|------|-----|------|-----|------|-------|------|-------|------|-------|
| 1.00 | 677 | 0.83 | 273 | 0.66 | 117 | 0.49 | - 7 | 0.32 | - 133 | 0.15 | - 296 |
| 0.99 | 677 | 0.82 | 262 | 0.65 | 110 | 0.48 | - 14 | 0.31 | - 141 | 0.14 | - 309 |
| 0.98 | 589 | 0.81 | 251 | 0.64 | 102 | 0.47 | - 21 | 0.30 | - 149 | 0.13 | - 322 |

The Working Formulae

- 5 For the calculation of a rating of a player who has not yet played 30 games:

$$R_p = R_c + D(p) * F$$

- R_p the rating of the player
 R_c the average rating of all his opponents, limited to a maximum difference of 350
 $D(p)$ the difference in rating based on the percentage score p , obtained from item 3
 F the correction factor depending on the percentage score p in the following way:

$$F = -2 * p^2 + 2 * p + 0.5$$

- 6 The new rating of a player with a fixed rating from the previous period is calculated by:

$$R_n = R_0 + \sum \Delta R$$

- R_n the new rating of the player
 R_0 the old rating of the player
 $\sum \Delta R$ the summation of the rating changes in all his games during the rating period

- 7 Calculation of a change in rating after a game is made by:

$$\Delta R = k * \Delta W = k * (W - W_e)$$

- ΔR the change of the rating for a finished game
 W the actual game result (1, ½, 0)
 W_e the expected result of the game
 k the rating point value for a game point (or: the development coefficient)

- 8 The expected game result W_e is the percentage expectancy, obtained from item 4, based on the difference between the player's rating and the opponent's rating as defined in Tournament Rule 9.4. If this difference is > 350, it is snipped to this value for the evaluation.

A player without a published ICCF rating at that time will be regarded as having a rating equal to the tournament level (see item 11).

- 9 The development coefficient k is used as a stabilising factor in the system:

$$k = r * g$$

$$r = \begin{cases} 10 & \text{if } R_0 \geq 2400 \\ 70 - R_0 / 40 & \text{if } 2000 < R_0 < 2400 \\ 20 & \text{if } R_0 \leq 2000 \end{cases}$$

- R_0 the old (that is: the most recently calculated) rating of the player
 g_n the total number of rated games played by this player

- 10 From 2009 onwards the former used significance factor f is no longer valid.

Arbeitsformeln

Für die Berechnung einer Wertung für Spieler, die noch nicht 30 Partien gespielt haben:

die Wertung des Spielers
 die durchschnittliche Wertung aller seiner Gegner, begrenzt auf eine maximale Differenz von 350
 die Wertungsdifferenz aus Tabelle 3 für das erreichte Prozentergebnis p
 der Korrekturfaktor, der auf folgende Weise vom Prozentergebnis p abhängt:

Die neue Wertung eines Spielers mit gesicherter Wertung aus der Vorperiode wird berechnet mittels:

die neue Wertung des Spielers
 die alte Wertung des Spielers
 die Summe aller Wertungsänderungen aus seinen Partien in der Wertungsperiode.

Die Berechnung der Wertungsänderung für eine beendete Partie erfolgt mittels:

die Änderung der Wertung für eine beendete Partie
 das tatsächliche Partie-Ergebnis (1, ½, 0)
 das erwartete Partie-Ergebnis
 der Wertungspunkt-Kurs eines Partie-Punktes (oder: der Entwicklungskoeffizient)

Das erwartete Partie-Ergebnis W_e ist die prozentuale Erwartung aus Tabelle 4, basierend auf der Differenz zwischen der Wertung des Spielers und der Wertung des Gegners, wie in § 9.4 (Turnierordnung) beschrieben. Wenn diese Differenz > 350 ist, wird sie für die Auswertung auf diesen Wert begrenzt.

Für Spieler ohne veröffentlichte ICCF Wertung zu diesem Zeitpunkt wird eine Wertung entsprechend dem Turnier-Level angenommen (siehe Punkt 11).

Der Entwicklungskoeffizient k wird als stabilisierender Faktor in dem System verwendet:

$$g = \begin{cases} 1 & \text{für } g_n \geq 80 \\ 1.4 - g_n / 200 & \text{für } 30 < g_n < 80 \\ 1.25 & \text{für } g_n \leq 30 \end{cases}$$

die alte (d.h. zuletzt berechnete) Wertung des Spielers
 die Gesamtzahl der bisher gewerteten Partien des Spielers

Ab 2009 wird der früher benutzte Signifikanzfaktor f nicht mehr berücksichtigt.

- 11 Assumed rating for a player without a published rating at the beginning of a tournament:

- 1800 Open class, cup preliminary rounds, international open preliminary rounds
1900 Ladies' WC semifinals, ladies' olympiads
2000 Higher class, cup semifinals, international open semifinals
2100 Ladies' WC finals, money price tournam.
2200 Master class, cup finals, olympiads, zonal championship preliminary rounds

For national tournaments the average of the already rated participants is assumed, maximum 2400.

For friendly matches, normally a value of 1800 applies. In special cases Team Captains are allowed to propose other values than 1800 where appropriate. These values have to be confirmed and may be changed by the Ratings Commissioner before a tournament starts.

For new kinds of tournaments a value shall be fixed with the announcement of the tournament.

Angenommene Wertung für Spieler, die zu Turnierbeginn keine veröffentlichte Wertung besitzen:

- 2200 Invitation (team) tournaments, international open finals
2300 Masternorm tournaments
2400 WC semifinals, zonal championship semifinals
2450 Grandmasternorm tournaments
2500 WC candidates, zonal championship finals

Für nationale Turniere wird der Durchschnitt der bereits gewerteten Teilnehmer benutzt, maximal 2400.

Für Freundschafts-Länderkämpfe gilt normalerweise ein Wert von 1800. In Ausnahmefällen können die Mannschaftsführer geeignetere Werte vorschlagen. Diese bedürfen der Zustimmung des Wertungsreferenten und können von diesem vor Turnierbeginn geändert werden.

Für neue Turnierarten wird ein Wert in der Turnier-Ausschreibung festgesetzt.

Calculation procedure

- 12 From 2009 onwards at the beginning of each quarter a new ratinglist is published. All results which were reported at least one month before will be eligible for inclusion on the next list.
- 13 Valid results from postal and email tournaments must be registered by the tournament directors on the ICCF-Webserver no later than two weeks before the list has to be published.
- 14 Players without a rating from previous periods get their first rating based on the games finished during the current period, using the formula 5.
- 15 Each player who has a rating based on less than 30 games at the beginning of the rating period, receives a new rating based on all his games. This is done with the formula of item 5.
- 16 For each player whose rating was based on at least 30 games at the beginning of the period the new rating is calculated using the formula 6, except for those players who finished more than $800/k$ games in the current period. For those players a new rating is calculated, based on the formula 5 only for their games in that period.
- 17 The new rating for the next ICCF rating list is rounded to the nearest integer.
- 18 Rules for the rating of games in team tournaments in which a substitute player takes part:
- A game of a substitute player is only counted for his new rating if ΔW is positive for him. Otherwise the game is counted for the player who has been substituted.
 - For the opponent the game is counted as being played against the player (the original or the substitute) with the highest rating.

Berechnungsmethode

- Seit 2009 wird zu Beginn eines jeden Quartals eine neue Wertungszahlenliste veröffentlicht. Alle bis spätestens einen Monat vorher gemeldeten Ergebnisse sind wertungsfähig für die nächste Liste.
- Die wertungsfähigen Ergebnisse aus Post- und Email-Turnieren müssen spätestens zwei Wochen vor dem Erscheinungsdatum von den Turnierleitern auf dem ICCF-Webserver registriert werden.
- Spieler, die bisher keine Wertung hatten, erhalten ihre erste Wertung, basierend auf den in der laufenden Periode beendeten Partien, gemäß Formel 5.
- Ein Spieler, dessen Wertung zu Beginn einer Periode auf weniger als 30 Partien beruht, erhält eine neue Wertung, basierend auf allen von ihm bis dahin beendeten Partien. Dazu wird die Formel in Punkt 5 benutzt.
- Für die Spieler, deren Wertung zu Beginn der Periode auf mindestens 30 Partien beruhte, wird eine neue Wertungszahl berechnet gemäß Formel 6, außer für solche, die in dieser Periode mehr als $800/k$ Partien beendet haben. Für diese Spieler wird die neue Wertung berechnet gemäß Formel 5, dabei werden nur die Partien aus der laufenden Periode berücksichtigt.
- Die neue Wertung wird für die nächste ICCF-Wertungsliste zur nächsten ganzen Zahl auf- oder abgerundet.
- Regelungen für die Wertung von Partien in Mannschaftsturnieren, in denen Ersatzspieler spielen:
- Eine Partie eines Ersatzspielers wird nur dann für seine neue Wertung berücksichtigt, wenn ΔW für ihn positiv ist. Sonst wird die Partie dem Spieler zugerechnet, der ersetzt worden ist.
 - Dem Gegner wird die Partie so zugerechnet, als ob sie gegen den Spieler mit der höheren Wertung gespielt worden wäre.
